**About Our Seminar**

**Heartsaver® First Aid CPR AED presented by Michael Egan**

Heartsaver® First Aid CPR AED is a classroom, instructor-led course that teaches students critical skills needed to respond to and manage a first aid, choking or sudden cardiac arrest emergency in the first few minutes until emergency medical services (EMS) arrives.

**Course Content:**
- Key changes reflecting the new science from the 2010 American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care
- First aid basics
- Medical emergencies
- Injury emergencies
- Environmental emergencies
- Adult CPR and AED use

Michael Egan is the founder and principal partner of Lifelink EMS. Lifelink provides development and training for government, healthcare and private industry in emergency medical response, Haz Mat response and technical rescue. Michael’s life safety career began in 1978 as a volunteer firefighter and CPR instructor while in high school. He is currently serves as career Firefighter Paramedic with 20 years experience. Michael has also served 20 years as a member of the MABAS Division 16 Technical Rescue Team and on the Underwater Rescue and Recovery Team. He currently is a member of the MABAS State of Illinois Hazardous materials team serving as the Division 16 Coordinator. Michael is a certified State of Illinois Fire Officer and Instructor. Michael also currently serves as Edward Hospital Paramedic Instructor and Preceptor. Michael also currently serves on the AFFI State of Illinois - EMS committee.

**Probes, Probes, & More About Probes! Presented by Kelly Morrissy CPE**

In this class Kelly will discuss the variety of probe companies and what they have to offer when it comes to type/size of probes and how this relates to the working electrologist. This thorough examination will highlight the benefits of each probe and ensure that you can choose the best tool for working with your clients. Come share your experiences with probes and take an in depth look with magnified pictures of others you may have not tried yet.

**Objectives:**
- Have an understanding of all the options of probes electrologists have to choose from
- Know the benefits of each probe
- Be able to select the best probe for every client

**Perfecting Your Insertions presented by Kelly Morrissy CPE**

Good insertions are a vital element to getting the best results in electrolysis. Kelly will discuss the key points to honing your insertion skills. In addition to all the great tricks and tips there will be a hands on lab time, so **bring any eye magnification that you use during treatments** to participate in this session where we will compare and contrast with each other and have peer assessment of insertions.

**Objectives:**
- Identify the key points to a great insertion
- Understand the benefits of exfoliation, using heat/anaphrodises, and hydration of the skin
- Understand the importance of lighting and magnification to enhance your work
- Explore a variety of techniques to assist in difficult areas such as cowlicks, neck, ears, nose, anus and genital areas.
- Experience a variety of probes and work on insertions with colleagues to get real life feed back.
